

WINDJAMMER SERIES 6000

GUTTER CONNECTED DESIGN

Priced Right

This gutter connected greenhouse is designed to meet almost any budget. The key to maintaining a low cost is our use of standard Windjammer components.

Easy Installation

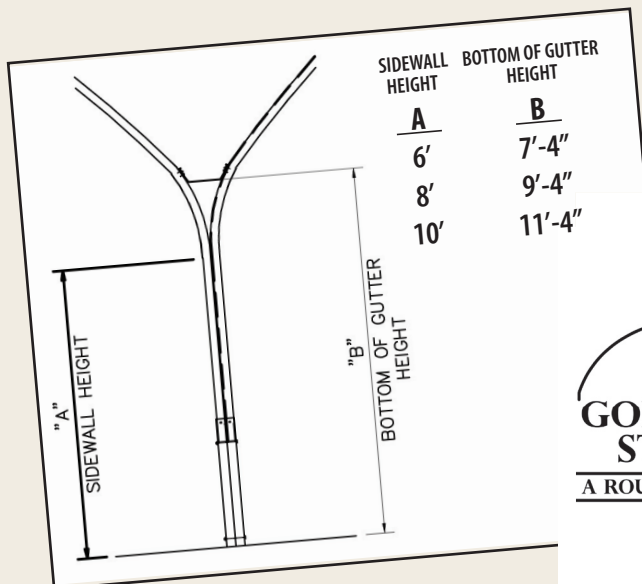

With easy to follow, step-by-step installation instructions you'll find this greenhouse a very simple structures to erect. Even first-time builders find the experience easily manageable.

Strong

Incorporating 2¼" square ground stakes and 2" square tubing, this is one of the strongest structures in its class.

High Tunnel Performance

Golden Pacific Structure's commitment to high side-walls and even higher peak heights ensure the growing quality within these greenhouses are optimized.
