

# CATAMARAN SERIES

Standing tall with 4'-0" side walls and an 8'-6" peak height these Golden Pacific structures are ideal for an educational setting or serious hobbyist. This 16' wide greenhouse is built with the same quality materials as our commercial structures. The 2" square steel bows and 4' bow spacing make this structure incredibly strong and durable. A set of easy to follow instructions and slip together construction make this greenhouse ideal for a first time builder. All houses are provided with a 3' x 6'-8" swing door and galvanized steel perimeter base board assembly.
